

National Society of Professional Engineers®

NSPE Student Membership

Who can join?

- Undergraduate Engineering Students of an accredited program
- Graduate Engineering or Students of an accredited program
- Students in two-year community or junior colleges who are enrolled in courses that prepare them to enter an accredited engineering program after graduation

All student members are affiliated with NSPE, their state society, and the local chapter of their state society.

What's in it for me?

There are two important components to successful engineering: **technical expertise** and **professional skills**. While the power that drives an engineer's successful design lies in technical expertise, **it is professional development in management, leadership training, communication, and business that determines the success of the engineering career**. Successful engineers will need to achieve balanced excellence in both their technical and professional development. NSPE membership will help achieve this balance for engineers who also hold membership in their discipline's technical society.

Active student membership in NSPE reaps benefits such as:

- Networking Opportunities
- Mentoring Programs
- Online Job Board
- Leadership Opportunities
- Comprehensive News of Current and Emerging Issues

In addition to enhancing professional development and providing a common forum for engineers, NSPE membership also provides benefits that are of immediate financial significance to its members. These include:

- Scholarships & Grants
- Licensure Prep Course Discounts
- Career Resource Discounts
- NSPE-branded WorldPoints Platinum Plus MasterCard
- Discounts on rental cars and business services such as FedEx

To join NSPE, please visit <http://www.nspe.org/TypesofMembership/Student/index.html>
