

NSPE Position Statement No. 09-1767—Licensure of Federal Engineers

Adopted: July 2012

Latest Revision: July 2018

NSPE Contact: Committee on Policy and Advocacy

Professional Policy Supported: 09-Licensure

The National Society of Professional Engineers advocates that federal employees, who by federal statute may be exempt from state engineering licensure laws, but who are in responsible charge of engineering activities as defined in the NCEES Model Law, should be required by federal agency policy to be licensed professional engineers in at least one jurisdiction.
