

NSPE Position Statement No. 10-66—The Engineering Team

Adopted: July 2018

Latest Revision: July 2018

Sunset Date: September 2020

NSPE Contact: Committee on Policy and Advocacy

Professional Policy Supported: 10-Professional Practice

It is the policy of the National Society of Professional Engineers (NSPE) to recognize that achievements in technology are usually the product of the collective efforts of a team of multiple contributors working toward a common objective. NSPE recognizes that in addition to engineers, these contributors may include: architects, surveyors, technologists, technicians, community and regional planners, landscape architects, geologists, and other recognized specialty disciplines. Successful accomplishment of a project involves the practical skills of all these disciplines.

NSPE will support the development of programs leading to public recognition of the vital contribution that all team members make to the accomplishment of successful engineering projects.
